THE KANSAS FOURTH

Thomas Ryan's Successor at Washington at Work.

General Harrison Kelley Interview the President, Visits the Depart-ments and Lays Out His Work for His Constituents--Changes in Lo-cal Offices May Be Looked for.

WASHINGTON, D. C., June 21.-General Harrison Kelley, of Burlington, Kansas, who was recently elected by 8,000 majority in the Fourth Kansas district to succeed Congressman Ryan, is in the city and expects to remain here for some time looking after the interests of his constituents. General Kelley visited the White House and formed the acquaintance of President Harrison. He is visiting the departments and meeting the members of the cabinet. He says there are a number of democratic postmasters in his district who deservo immediate attention and he expects to tarry in the neighborhood of the postoffice department until the republican successors of these democratic postmasters have been chosen. There are likewise, some other democratic officehoiders in this district whose services can be spared, and General Kelley will ask for their relief at an early date.

THE SONS OF AMERICA.

Declaration of Principles, Washington, D. C., June 22.—Two ar-licles in the declaration of principles of the Patriotic Sons of America, read:

Art. 5. We cordially welcome those for signers who come to this country with the honest desire of becoming loyal American citizens and who sincerely disavow any and

sitizens and who sincerely disavowany and all allegiance to foreign potentates and governments; and who honor and revere our national flag.

Art. 8. We invite all native born citizens who believe in their country and its institutions, and who desire to perpetuate free government and who wish to encourage protherly feeling among Americans to the and that we may exalt our country, to join with us in this our work of fellowship and love.

with us in this our work of fetlowship and love.

Which show that the appellations of "Know Nothings" and "Anti-Catholics" do not apply to the organization.

Upon the land question, Article 6 says: We are opposed to the occupancy of any part of our land by foreign speculators or adventurers, who do not wish to become citizens, and we believe that all the resources and privileges of the country should de reserved for the exclusive use of our citizens, native or naturalized.

The proscriptive principle of the declaration is embodied in Article 7: We favor crushing out that which is already here and taking measures that will prohibit from entrance into our ports in the future of that foreign element which comes here to advocate communism and nikhlism, and which does not identify itself with our country, and does not respect our flag.

O'Sullivan the Ice Man.

Cmcago, June 22.-P. O'Sullivan the ice man indicted for complicity in the Cronin tragedy, has been removed to the boys department of the jail, the recognized haven for "squealers." O'Sullivan is the person whose business card and whose curious contract with the doctor for medical services were used to lure Cronin to death. The story is given out that the ice man has offered to make a clean breast of everything he knows. His motive power for being willing to confess is alleged to be fright over the arrest of Burke at Winnipeg, and the disclosures that Cooney, the "fox" is being actively pursued. Considerable credit is given to the statement as to the ice man, but it is tempered son ewhat by the suspicion that it is simply a part of a series of shrewed tactics on the part of the authorities to break down one or another of the suspects. partment of the jail, the recognized haven

California's Grape Crop. San Francisco, June 21.-"It looks he though California would have the largest of grapes in the history of the state,' said Manager Wetmore of the viticultural commission in reply to a question regarding crop prospects. White grapes are settling for a full crop and, nothing unfortunate happening between now and vintage time, we ought to produce from 20,000,000 to 25,000,000 gallons of wine. The raisin crop also will be a heavy one and the state will produce 1,000,000 bores this year. Tokay and Muscat grapes are looking excellently. The outlook for the wine market is not very good. At least half of last year's vintage is in the hands of the producers, who will not sell at the ruling low prices. As a consequence there will not be sufficient cooperage to handle all the wine grapes, which are bound to bring small figures." Mr. Wetmore says this is a great time for capitalists to make money in wine distilleries. said Manager Wetmore of the viticultural

WASHINGTON, D. Otis Humphrey, the Illinois member of the commission was received. Mr. Humphrey allegee as the reason for resigning that his law practice will not allow him to spare the time necessary for the duties. When Congressman Springer, was here a few weeks ago he ventured the prediction that Mr. Hamphrey would resign. He belief this belief upon a

conversation he had with Mr. Humphrey a short time before in Springfield. Mr. Humphrey seems to have reached the conclusion that the Cherokee commission promised a closer engagement than he wanted. Hence, he resigns.

Secretary Noble and the president held a conference over the matter, and a telegram was sent to General John F. Hartranft, of Pennsylvania, tendering him the place vacated by Mr. Humphrey.

The Green Midge Destroying Wheat INDIANAPOLIS, June 20.—The complaints of the destruction of wheat by a strange insect are increasing. They come chiefly

STATE OF TRADE.

Better Feeling -- Demoraliza tion of Rates Spreading.

Export of Gold Continues Large--Crop Prospects Generally Im-proved -- Wool Stronger--Wheat Advanced--General Tendency of Prices Upward--Stocks a Shade

New York, June 24.-R. G. Dun & Co.'s

eekly review of trade says: There is a better feeting, with larger transactions in iron and wool, and crop prospects are now more favorable; but the agreement of railway presidents has not prevented a renewal of strife, and the demoralization of rates is spreading widely. Meanwhile the exports of gold will exceed \$4,400,000. If the railway outlook continues to discourage foreign investors, and the banks begin the last half of the year with low reserves, gold going out, and large crops to be moved, the monetary prospect will not be quite encouraging.

Trade is rather quiet at Kansas City, and outside of speculative operations and the iron trade, it is generally dull at Philadelphia, but marked improvement is noted at Pittsburgh, and in a less degree at Cleveland. The demand for money is rather active there, but generally very moderate, with collections on the whole not preceptibly better. Rains have decidely improved crop prospects in the northwest, so that great hopefulness tinges all the commercial reports from that section, and the demoralization of railroad rates is commonly supposed to prompt better returns to farmers, while the difference in the cost of transporting eastern products to western consumers is already considerable throughout the region north and west of Illinois.

The markets for manufactured products Trade is rather quiet at Kansas City, and

the region north and west of Illinois.

The markets for manufactured products are stronger and higher. In coal recent hopes have not been realized. It is even stated that the Reading Company has not received a single order at the late advance, and sales below the schedule are reported at Philadeiphia. Copper is unchanged, but tin is lower at 20 cents, production having been stimulated. Wool is rather stronger.

Wheat has been advanced 134 cents with sales at 60,000,000 bushels here during the week. But this speculative movement seems to take no action of the account.

Wheat has been advanced 1½ cents with sales at 60,000,000 bushels here during the week. But this speculative movement seems to take no action of the account that wheat and flour, equivalent to about 40,000,000 bushels in excess of a minimum stock, will probably remain of the last stock July 1, added to a new supply, which promises to exceed all requirements for the next crop. Corn is ½ and oats ½ higher for no other reason than because wheat advances. Cotton has declined an eighth. A long expected break in coffee lowers the price 1½ cents, with sales of 696,000 bags. But the price is still 15 cents for December options, against 9½ cents a year ago, and operators wonder that the public does not buy. Pork, lard and hogs are a fraction lower, sugar unchanged for this week and leather half a cent higher for some grades.

The general tencency of prices has been slightly upward. The heavy shipments of gold this week are a surprise to many, and are attributed by some bankers to the needs of the bank of France and the large expenditures of the Americans at the experition.

large expenditures of the Americans at the exposition. But the balance of foreign trade has been for months so heavily against this country that no such explanation of gold shipments in processary.

alpments is necessary.
For June thus far merchandise exports from New York are 16 per cent larger than last year with imports somewhat smaller, but even these changes would leave a heavy excess of imports over exports to be met by shipments of securities or gold. At present the temper of speculation does nat encour-age the belief that foreign buyers will take relibrar securities largely.

age the benef that foreign buyers will take railway securities largely.

On the contrary, demoralization of railroad stocks is likely to be followed by foreign sales. The stock market is a little lower than a week ago, but with great speculative strength still shown in the stocks which have been controlled by powerful combinations.

which nave open controlled to the combinations.

The business failures number 220, as compared with 250 last week, and 225 the week previous. For the corresponding week of last year the figures were 204.

lower Missouri valleys, and from the interior of Texas and Louisians northward to Missouri and Nebraska. More than the usual amount of rain is reported from Georgia, Tennessee, Michigan, Wisconsin, Pennsylvanis and New York, while well distributed showers occurred in the south Atlantic states, Virginia, New England and Dokota. The rainfall for the season continues in excess on the Atlantic coast from New York southward to South Carolina and from the Missouri valley southward to the west gulf coast. In northwestern Minnesota and northeastern Dakota the rainfall for the season has not exceeded 60 per cent of the usual rainfall for that section. The weather is generally favorable for growing crops, in all districts except Tennessee, Mississpin and Texas, where excessive rains caused some damage to wheat and cotton. Reports from these states show that the crops are growing rapidly and becoming grassy. In the principal corn states, including Illinois, Indiana, Iowa, Kansas and Nebraska, the weather was favorable and corn has made rapid growth during the week. In the east and central portions of the cotton region, all crops were favorably affected; the wheat harvest is about completed, and the crop prospects are reported fine.

A NEW "WITNESS" TUR S UP.

An Individual Who Will Probably Prove To Be As Great a Liar As Woodruff.

CHICAGO, June 25 .- A man who claims to be an important witness in the Cronin case be an important witness in the Cronin case has turned up. He is George E. Brooks, a news agent running on one of the railroads coming in at the union depot. Brooks, who is a small man, about 23 years of age, is intelligont looking, and a good talker. His story is to the effect that on the night of May 4, he was driving in Lake View with his sweetheart, and that happening along Ashland avenue, he saw three men loading the trunk into the wagon at the Carison cottage, and that about half an hour later he saw the same men dumping the contents of the trunk into the catch basin in which the body of Dr. Cronin was found. He also says that he saw the men distinctly and will be able to identify them. He is ready to produce the young woman as soon as the authorities want her.

Brooks' explanation of his failure to tell his story before, is that he was afraid of losing his life, as he believed the men concerned in the murder were so desperate they would kill any one who they thought would turn up as a witness against them. He said the knowledge he possessed had so weighed on his mind that he could not keep it to himself any longer, and believing it was a duty he owed himself and the community, he had at last decided to tell all he had seen. He first stipulated that he be given protection. This was promised him. Brooks told his story to Chaef Hubbard with whom he was closested for over two hours. has turned up. He is George E. Brooks, a

A stiff breeze was blowing up the river, against the crewa, and over the first three miles the water was quite rough. The interest in the race centered almost wholly in the exhibition given by the Yale as a means of judging her chances in the big race of next Friday against Harvard, The comments on the result vary widely.

The Expressman Identifies Burke. CHICAGO, ILL., June 24.-Martin Burke the Winnipeg suspect, has been positively identified as one of the Williams brother who are credited with being Dr. Cronin a slayers. The person who identifies Burke is the expressman who was employed by one of the Williams to convey the funiture to the cottage. News of the identification of of the Williams to control the cottage. News of the identification of Burke, and the circumstances under which Burke was seen by the expressman at Winnipeg was received in a message to Chief of Police Hubbard from a Chicago officer as

"Martinsen, the expressman, instantly and fully identified Brake, picking him out of fifty-two men, drawn in line in the jail yard in presence of the Crown attorney and

Burke's lawyer; wire instructions."

Chief Hubbard replied that the extradition papers for Burke were now enroute, and would be pushed forward with all speed

DENOUNCED FROM THE BENCH. A Judge Pictures a Convict as a Perjurer and a Hypocrite.

New York, June 25.—Rev. William E. Howard, convicted of grand larceny in con-nection with the Electric Sugar Refining Co. frauds, was sentenced by Recorder Smythe in Part II, General Sessions, to nine years and eight months imprisonment in Sing

and eight months imprisonment in Sing Sing at hard labor.

A motion was made for a new trial on the ground that the verdict was contrary to law, and on account of errors in the judge's charge to the jury. The motion was denied. In sentencing the prisoner the recorder said:

"A greater fraud was never brought to my notice. You are a perjurer and a hypocrite. You went on the witness stand and perjured yourself a sain and again."

Howard had nothing to say. He listened attentively to the remarks of the judge, but when sentence was prouounced made no sign either of surprise or interest. The trials of the other prisoners in the case will be set for an early day.

Another Arrest. CHICAGO, June 25.-A new arrest has been made in the Cronin Case. The prisoner is Michael Walsh, a plumber who has been working at Joliet. He knew Martin Burke, the Winnipeg suspect, in Chicago. Burke, it is reported, turned up in Joliet the day after the Cronin tragedy, and remained with Walsh practically penniless until June 9, when it is thought a money order came to the Winnipeg man from Chicago. The natural inference would be that Walsh's arrest was due to a desire on the part of the police to elicit anything of value he may know regarding Martin Burke, the supposed Frank Williams, with whom Dr. Cronin drove off the night of May 4, never to be seen again. ade in the Cronin Case. Grain Freights from Chicago. Chicago, June 25.—With daily receipts of corn that would not give loads to any of the larger sized vessels, lake grain freights are in a bad way. The corn in store here at the end of last week was 2,900,000 bushels; at the close of the present week it will not be over 2,000,000 bushels. The consequence is that the vessel agents find it difficult to get cargoes for their boats, and rates rule weak and freights extremely dull at Thursday's decline.

WEATHER CROP BULLETIN

Of the Kansas Weather Service, in Co-Operation With the U.S. Signal Sarvice, for the Week Ending June 22, 1889,

PRECIPITATION. There has been a decided excess of rain-

fall in the southern and southeastern counties, culminating in Bourbon and the contiguous portions of Butler, Marion and Chase, where it reached six inches and upwards. The excess extends northward into the northeastern counties, and through the southern tier of counties to the west line of the state, thence through the western tier north into Cheyenne and Rawlins. A defi-tiency exists in the west central and central western counties.

TEMPERATURE AND SUNSHINE.

TEMPERATURE AND SUNSHINE.

The temperature has ranged slightly below the normal in the eastern division, being above on the 18th and 19th, but varying 1.5 degrees below for the week. In the central and western division it has been above the normal until the cool wave of the 20th and 21st. In the east half of the state the sunshine has been about an average but above. shine has been about an average, but above in the west half.

RESULTS: The favorable effects of the weather are most marked in the extreme west where the face of nature has been transformed; the grass is again green, ponds are full of water, hay is assured, new potatoes are being marketed, wheat and rye are being harvesthay is assured, new potatoes are being marketed, wheat and rye are being harvested and the farmers are encouraged. The past week has improved the oat crop over the entire state, and in a large portion of which it promises a greater yield than that of last year. The wheat is excellent, being so heavy as to require from four to six horses to work the binders. Wheat harvest is now in progress in nearly every county. In the south, home-grown peaches and apples are in the market. The heavy floods did much damage in Butler and Bourbon. In Butler the Welnut overflowed Sunday morning, flooding the valley to a depth of eight feet, much wheat in shocks was swept into the river, from which, the farmers are into the river, from which, the farmers are gathering and drying it. In Bourbon where the enormous rainfall of 6.60 inches occurred in twenty-four hours (2.40 of which fell in two hours, and 3.70 in another two hours) all the crops in the Marmaton river and Mill Creek bottoms are more or less damaged, some fields being washed out and others covered up.

T. B. Jennings, Assistant Signal Corps Director.

Mrs. J. Ellen Foster's Opinion. hairman of the Woman's National Republican committee, and well known as a republican prohibitionist, was in the city on her way home from Rhode Island, where she was actively engaged in the amendment campaign. Speaking of recent defeats in the east, she says that it is only a new evidence of the power and extent which the liquor traffic has acquired. "Prohibition," she said, "only had three years' trial in Rhode Island, and it was not a fair or adequate one." She claimed the liquor men three liquor broacast. The contest in Massachusetts and Pennsylvania, she said, was free and fair. "The attempt," she said, "to place the responsibility of our defeat in those two states upon the republican party is wholly unwarranted. The campaigns from their inception were openly and necessarily non-partisan."
"What will the temperance people do now?" publican prohibitionist, was in the city on
